3rd man

JFK assassination records appeals
field office records ("third man")
photographs
fieldnotes

Harold Weisberg 9/7/79

By means of attached 80-10000-4303 I amplify my prior appeals. I believe that FBHQ's ability to make instant retrieval of information - particularly of information not provided to me in the form of the underlying records - is further indication of the existence of fieldnotes also not provided. I believe further that the names listed on this record include those whose need included such fieldnotes.

You will recall that when the FBI did not set up a date for me to examine the JFK assassination photographs I requested copies of all, that when I received no response I appealed and that you have not acted on that appeal.

You will also recall, I believe, that my FOIA requests go back to 1/1/68 when I requested copies of the Doyle, Florida (Minneapolis) and WCDC-TV films. I have just recently received a copy of the Doyle film when it was made available to a later requestor. The records I provided you refer to Oswald and two young men passing out leaflets on August 9, 1963.

As the attached record confirms, Oswald had two young men helping him on August 16, when Oswald also arranged for WDSU and WWL to film his leafletting outside the Clay Shaw Trade Mart. One was identified as Charles Dale Steele, Jr. The other cannot be any of those identified in that still color of this film because they are not "young men" and because the photographer, Aloysa Bush, told the FBI they were not involved in handing out the leaflets. (In news reports the FBI gives the name as "Bush".)

My prior appeals include the still photographs made from the TV footage. The FBI did not give the Warren Commission copies of all such stills.

What makes this most interesting is the language "There was one individual... with Lee Harvey Oswald when we were not able to identify" and "A New Orleans television station photographed this activity by Oswald and the two associates..." All those in the existing film were identified. The two other men are not young and were never Allen and Bhem. With his expert-impact testimony in the Doyle Mark and can be seen leaving that building.
